Treating, eliminating negative dysphotopsia

“The peripheral arcuate shadow that patients see is the result of square-edge optics causing a refraction of the rays that pass through the edge of the lens that go in opposite directions (leaving a blind spot), and that creates a shadow That always happens If that shadow falls anterior to the functional retina, then you can't see it

KEY CONCEPT Positions of the Sun and Moon affect Earth.

The Moon becomes dark during a lunar eclipse because it passes through Earth's shadow There are two parts of Earth's shadow, as you can see in the diagram above The is the darkest part Around it is a spreading cone of lighter shadow called the Just before a lunar eclipse, sunlight streaming past Earth produces a full moon

Law Me Alive!

The Shadow Even though I walk through the darkest valley, I fear no evil Psalm 23:4 Whenever I visit a hospital ICU, I'm impressed with the specialized care and astonishing medical technology there My friend is very weak, a nonagenarian approaching the valley of the shadow And she is not afraid She is a person of great faith in God
